

## **WET WRAP USAGE DIRECTIONS**

Apply cream or ointment as prescribed. Wrap the involved area with a damp cloth. We recommend that the damp cloth be left in place over night.

### **Suggestions:**

- Use a wet cotton tube sock for the arms or legs. This can be achieved by cutting the toe portion of the sock out.
- Use a cotton long-sleeve T-shirt for areas that involve the torso (back, chest or stomach)
- Cotton pants or pajama bottoms work well for the upper leg, thigh or buttocks.
- This treatment works best if you continuously use the same garment without washing between uses. This will allow the medication to build up in the clothes and aids in the effectiveness of the treatment. After a few days, the clothing may be washed.

Please contact our clinic for more information, questions or concerns. Our medical staff will be more than happy to answer any questions or concerns that you may have during your treatment.
